Something Truly Golden...

Level ϕ : "Midas' Touch"

Survival Difficulty: Class ϕ

» ☐ Unsafe

» ☐ Unsecure

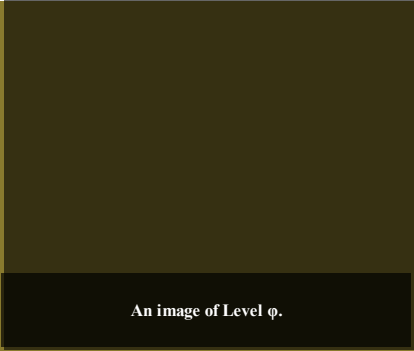

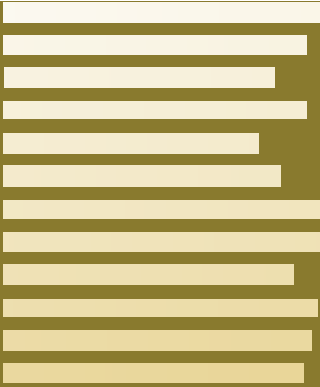

» ☐ Body-Altering Hazards

Level ϕ is a sub-level located in between Level 1 and Level 2.

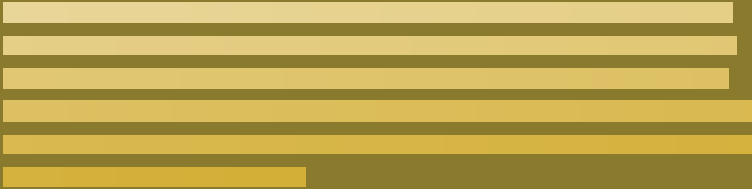

Description

Level ϕ (stylized as Level ϕ or Level

s to

The Ruins

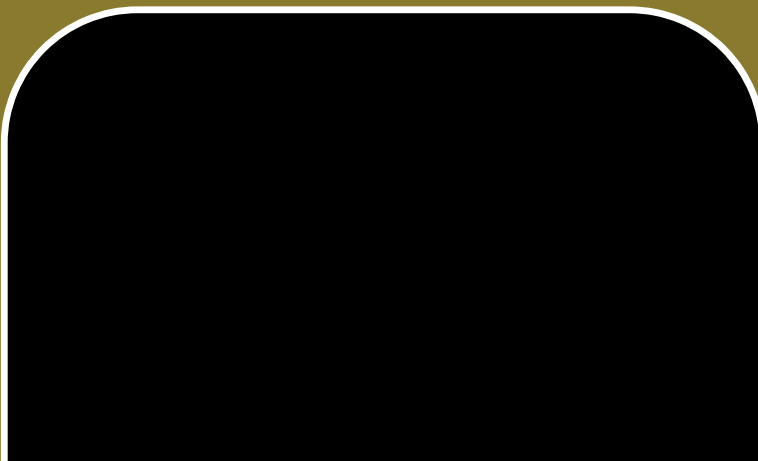

The Ruins appear to be a set of ancient ruins of inconsistent appearance located at random intervals

Entities

Currently, no entities have been documented in **Level ϕ** .

Entrances and Exits

You had to get curious, didn't you, Gary?

Level ϕ : "The Golden Spiral"

Survival Difficulty: Class Undetermined

» ☐ Mysterious Properties

» ☐ Heavily Unstable

» ☐ Undocumented Entities

All that is mentioned above is nothing but a mask, sweeping the true nature of **Level ϕ** under the rug.

When one hears the concept of a world of mathematics, they would assume a chaotic world, filled to the brim with equations, algebra, digits, and operations, as many other would.

However, they would be mistaken with this assumption; numerical worlds can take physical forms and have characteristics similar to that of our own, though they still sport much stranger environments than that of our own world.

Level ϕ (commonly called "The True Level ϕ ") is an incredibly unknown space within the Backrooms, and usually remains unseen due to the unreliability of its entrance from the ruse which shields it. It consists of a jet-black pathway of an unknown material, consistently turning clockwise and going upwards at an angle of about 5°. The current length and path which this pathway takes is currently unknown, though it is theorized to look like a **golden spiral** from a top-down view. The pathway is completely shrouded in a white fog, which can make it hard to see, and as such, make it easy to fall off the pathway and into the endless nothing below. At times, one can find instances of equations related to the Golden Ratio floating about, including the decimal value of the Golden Ratio, the fractional form of the Golden Ratio, the Greek symbol of ' ϕ ' (both in uppercase and lowercase) and miniatures of the **golden spiral**. The fate of those who fall off the pathway and into the foggy infinity is completely unknown.

Photographs of **Level ϕ** are unable to be taken since they cannot comprehend the manifestation of the Golden Ratio. It is also currently unknown how **Level ϕ** has been able to split itself into 2 incredibly different spaces - in fact, it was completely unknown that these 2 spaces were connected until holes in the ruse were found punched into the walls, presenting the same white fog (such incidents have not been photographed thus far, therefore they should be taken with a grain of salt). Other similarities exist but shall remain undisclosed.

Only one entrance has been found to **Level ϕ** , that being occasionally no-clipping through the floor of the ruse. No exits have been found.

Those who enter the truth of **Level ϕ** , the Golden Ratio, are doomed to wander the mathematical mystery it offers.

You've found the truth now, have you?

You've found these lands of nearly zero hue;

You listen once again to the mathematical tune

That you heard once upon a blue moon.

*What was this place called? Was it **Level** ϕ ?*

It's withheld a secret, so, so, very sly!

It doesn't matter, not anymore,

For now you must walk the jet-black path forevermore.

You are now completely trapped, to your sorrowful dismay,

The stories that you wish to tell won't be heard, I say!

Entrances

- No-clipping into a golden box in Level 1 will bring one here;
- Entering a door made of Gold with ' Φ ' above in Level 2 will lead one here;
- Finding a computer with a monitor presenting ' ϕ ' in ASCII art in Level 4 and pressing the
- Entering through a door labeled ' ϕ ' in Level 51 will lead one here.

Exits

- Nocliping into the walls or floor will occasionally take one to Level 1. This might take
- Nocliping into a pipe results in one landing in Level 2. This also might take several tries;
- *Phasing through the floor can occasionally take one to the true manifestation of the Golden*
